Master Diploma Supplement

University of Amsterdam

Faculty of Social and Behavioural Sciences

Purpose of this document

This Diploma Supplement model was developed by the European Commission, Council of Europe and UNESCO/CEPES.

The purpose of the supplement is to provide sufficient independent data to improve the international 'transparency' and fair academic and professional recognition of qualifications (diplomas, degrees, certificates etc.). It is designed to provide a description of the nature, level, context, content and status of the studies that were pursued and successfully completed by the individual named on the original qualification to which this supplement is appended. It should be free from any value judgements, equivalence statements or suggestions about recognition. Information in all eight sections should be provided. Where information is not provided, an explanation should give the reason why.

- | | | |
|-----|---|---|
| 1. | | Information identifying the holder of the qualification |
| 1.1 | <i>Family name(s)</i> | Kunfermann |
| 1.2 | <i>Given name(s)</i> | Katerin |
| 1.3 | <i>Date of birth</i> | 27 October 1994 |
| 1.4 | <i>Student identification number</i> | 12225223 |
| 2. | | Information identifying the qualification |
| 2.1 | <i>Name of qualification and title conferred</i> | Master of Science in Communication Science
(Communicatiewetenschap) |
| 2.2 | <i>Main field(s) of study for the qualification</i> | Communication Science
Track Corporate Communication |
| 2.3 | <i>Name and status of awarding institution</i> | Universiteit van Amsterdam (University of Amsterdam) founded in 1632 as an Illustrious School (Athenaeum Illustre) by the city government of Amsterdam, and recognized as a public university by the National government in 1877. |
| 2.4 | <i>Name and status of Institution administering studies</i> | Faculty of Social and Behavioural Sciences (Faculteit der Maatschappij- en Gedragwetenschappen)
Graduate School of Communication |
| 2.5 | <i>Language(s) of instruction/examination</i> | English |

3.		Information on the level of the qualification
3.1	<i>Level of qualification</i>	Master of Science
3.2	<i>Official length of programme</i>	The official duration of the programme is one year; 60 EC.
3.3	<i>Access requirement(s)</i>	1. Students possessing a Bachelor's degree in Communication Science awarded by the University of Amsterdam, VU University Amsterdam, Radboud University Nijmegen or the University of Twente may enter the Master's programme. 2. Students possessing a Bachelor's degree who can demonstrate having knowledge, understanding, and skills comparable in level and focus to the Bachelor's programme in Communication Science of the University of Amsterdam, may enter the Master's programme. 3. Students possessing a Bachelor's degree in other fields, may enter the Master's programme through completing a preparatory programme which teaches the students knowledge, understanding, and skills comparable in level and focus to the Bachelor's programme in Communication Science of the University of Amsterdam.
4.		Information on the contents and results gained
4.1	<i>Mode of study</i>	Full-time
4.2	<i>Programme requirements</i>	After completing the Master's programme in Communication Science students have: 1. Expertise in a specific field of communication Master graduates have an in-depth knowledge and understanding of the theories, research findings, processes of mediated communication, contributions of other disciplines, and ethical and normative aspects relevant to their field. They are able to increase and develop their knowledge and understanding independently through study and analysis. They are able to relate theory and actual processes of mediated communication at advanced levels, to integrate different concepts and findings into new theoretical frameworks and hypotheses, to develop and apply original ideas, and to analyse and interpret current phenomena accordingly 2. Expertise in empirical research Master graduates are able, independently and on their own, to set up, conduct, report and interpret standard and advanced academic research, respectively. 3. General intellectual skills and academic abilities Master graduates are able to analyse, reason, judge and reflect at proper academic levels and regarding complex issues, both within and outside the field in which these abilities were acquired. They have the academic and intellectual ability to analyze complex problems in new or unfamiliar environments, to formulate judgements with incomplete or limited information, and to communicate findings clearly and unambiguously to specialist and non-specialist audiences. 4. Academic attitudes Master graduates are inquisitive, analytic, critical and non-dogmatic. They are able and willing to reflect on their own assumptions, ideas and activities. They are keen to acquire new knowledge and expertise. They agree on an academic view of the progress of science.

4.3 Programme details

**Master's in Communication Science
Track Corporate Communication**

	Exam Date	EC	Grade
Programme			
Compulsory courses: Research Methods			
Using R for data wrangling, analysis and visualization	31/01/2019	6	7.2
Mandatory electives			
Political Marketing	29/03/2019	6	7.8
Sustainability Marketing and Communication	29/03/2019	6	8.1
Compulsory courses: Specialisation Seminars			
Strategic Communication of Organisations	18/12/2018	12	6.9
Strategic Communication in Organisations	20/12/2018	12	7.0
Compulsory courses: Thesis			
Thesis Corporate Communication	28/06/2019	18	7.5
Issue Supremacy: The influencer role of organizations in online social networks			
Total EC:		60	
GPA:			7.34

1.0 - 4.5					F	4.0		Fail

* The given conversion scheme is suggested for broad orientation purposes only. For more information on the Dutch grading culture in comparison to other cultures, please consult www.nuffic.nl.

For information on workload and ECTS, please see the appendix on the higher education system in the Netherlands.

See appendices for the Dutch credit system and marking.

4.5 Overall classification of the qualification

The Examinations Board may award the Master degree with distinctive classification. If so, the distinctive is explicitly mentioned on the degree certificate itself.

5. Information on the function of the qualification

5.1 Access to further study

The MSc degree entitles the holder to apply for enrollment in a PhD programme.

5.2 Professional status

Academically trained Communication and Media professional.

6. Additional information

6.1 Additional information

The degree programme was accredited by the Accreditation Organization of the Netherlands and Flanders (Nederlands-Vlaamse Accreditatie Organisatie) on 28 August 2019.

The higher education system in the Netherlands.

This section describes the higher education system in the Netherlands. It is based on a three-cycle system consisting of Bachelor, Master and PhD degrees. A description of admission requirements, the Dutch marking system and degree accreditation is also included.

Secondary education

Secondary education, which begins at the age of 12, is compulsory until the age of 16 and is offered at several levels. The two programmes of general education that lead to higher education are HAVO (five years) and VWO (six years). Pupils are enrolled according to their ability, and although VWO is more rigorous, both HAVO and VWO are characterised as selective types of secondary education. The VWO curriculum prepares pupils for university and only the VWO diploma grants access to WO (research universities). The HAVO diploma is the minimum requirement for admission to HBO (universities of professional education). The last two years of HAVO and the last three years of VWO are referred to as the second phase ('tweede fase'), or upper secondary education. During these years, pupils focus on one of four subject clusters ('profielen'), each of which emphasises a specified area of study, in addition to satisfying general education requirements. Each cluster is designed to prepare pupils for programmes of study at the tertiary level. A pupil enrolled in VWO or HAVO can choose from the following subject clusters:

- 1) Science and Technology ('Natuur en Techniek')
- 2) Science and Health ('Natuur en Gezondheid')
- 3) Economics and Society ('Economie en Maatschappij')
- 4) Culture and Society ('Cultuur en Maatschappij')

Higher education

Higher education in the Netherlands is offered at two types of institutions: research universities ('universiteiten' or 'Wetenschappelijk Onderwijs') and universities of professional education ('hogescholen' or 'Hoger Beroepsonderwijs'). The former comprise general universities and universities specialising in engineering and agriculture. The latter comprise general institutions and institutions specialising in a particular field, such as agriculture, fine and performing arts, or teacher training.

Since September 2002, the higher education system in the Netherlands has been organised around a three-cycle system consisting of Bachelor, Master and PhD degrees. At the same time, the ECTS credit system was adopted as a way of quantifying periods of study. However, the higher education system continues to be a binary system with a distinction between research-oriented education and professional higher education.

The level of a degree programme determines both the number of credits required to complete the programme and the degree that is awarded. A WO bachelor's programme requires the completion of 180 credits (3 years) and graduates obtain the degree of Bachelor of Arts or Bachelor of Science (B.A./B.Sc.), depending on the discipline. An HBO bachelor's programme requires the completion of 240 credits (4 years), and graduates obtain a degree indicating their field of study, for example Bachelor of Engineering (B. Eng.) or Bachelor of Nursing (B. Nursing). The previous title appropriate to the discipline in question (bc., ing.) may still be used.

WO master's programmes mostly require the completion of 60 or 120 credits (1 or 2 years). Some programmes require 90 (1.5 years) or more than 120 credits. In engineering, agriculture, and maths and the natural sciences, 120 credits are always required. Graduates obtain the degree of Master of Arts or Master of Science (MA/MSc). The old title appropriate to the discipline in question (drs., mr., ir.) may still be used. HBO master's programmes require the completion of 60 to 120 credits, and graduates obtain a degree indicating the field of study, for example Master of Social Work (MSW).

The third cycle of higher education is offered only by research universities, which are entitled to award the country's highest academic degree, the doctorate, which entitles a person to use the title doctor (dr.). The process by which a doctorate is obtained is referred to as the promotie. The doctorate is primarily a research degree, for which a dissertation based on original research must be written and publicly defended.

Requirements for admission to higher education

To enrol in a WO bachelor's programme, a student is required to hold a VWO diploma or to have completed the first year (60 credits) of an HBO programme. The minimum admission requirement for HBO is either a HAVO school diploma or a level-4 MBO diploma. For admission to both types of higher education, pupils are required to have completed at least one of the subject clusters that fulfils the requirements for the higher education programme in question. A quota ('numerus fixus') applies to admission to certain programmes, primarily in the medical sciences, and

places are allocated using a weighted lottery. Applicants older than 21 years who do not possess one of the qualifications mentioned above can qualify for admission to higher education on the basis of an entrance examination and assessment.

For admission to all master programmes, a bachelor degree in one or more specified disciplines is required, in some cases in combination with other requirements. Graduates with an HBO bachelor may have to complete additional requirements for admission to a WO master programme.

Credit system and marking

A student's workload (both contact hours, and hours spent studying and preparing assignments) is measured in ECTS credits, whereby under Dutch law one credit represents 28 hours of work and 60 credits represents one year of full-time study.

The marking system has been the same for several decades: the scale is from 1 (very poor) to 10 (outstanding). The lowest pass mark is 6. The mark 9 is seldom awarded, and the highest pass mark 10 is extremely rare. Decimal values may be used (e.g. 7.8).

Accreditation and quality assurance

A guaranteed standard of higher education is maintained through a national system of legal regulation and quality assurance. The Ministry of Education, Culture and Science is responsible for legislation pertaining to education. A system of accreditation was introduced in 2002. Since then, the new Accreditation Organization of the Netherlands and Flanders (NVAO) has been responsible for accreditation. According to the section of the Dutch Higher Education Act that deals with the accreditation of higher education (2002), degree programmes offered by research universities and universities of professional education will be evaluated according to established criteria, and programmes that meet those criteria will be accredited, that is, recognised for a period of six years. Only accredited programmes are eligible for government funding, and students receive financial aid only when enrolled in an accredited programme. Only accredited programmes issue legally recognised degrees. Accredited programmes are listed in the Central Register of Higher Education Study Programmes (CROHO) and the information is available to the public. Institutions are autonomous in their decision to offer non-accredited programmes, subject to internal quality assessment. These programmes do not receive government funding.
